

## Grazing Systems For Non-Traditional Producers

**Tuesday, November 17—1-2 p.m.**

**Bluebonnet Room, Tarrant County Extension Office, 200 Taylor St., 5th Floor, Fort Worth**

Unconventional grazing systems typically involve an unusual management effort, an unusual kind or class of livestock, multi-species grazing, and more often a combination of these three. Join the webinar to learn about the what, where, and why options, with conservation benefits only one of the reasons to participate.

### *Presenter*

**Jess J. Jackson, Jr.**

NRCS National Partnership Liaison located here in Fort Worth. He earned his Master of Agriculture degree in Range Science, and two Bachelor of Science degrees— one in Range Science and one in agronomy all from Texas A&M University. His fields of expertise include: soil health, pasture grazing system design and non-traditional livestock grazing systems.

Webinar will be held in the Extension office Blue Bonnet room. There is no fee for the program, but registration must be made by noon on the day before. If there are no registrations, the program will be cancelled.

To register contact the Extension office at 817.884.1945
